

**AEROSOLITUTKIMUSSEURA R.Y.
FINNISH ASSOCIATION FOR AEROSOL RESEARCH
REPORT SERIES IN AEROSOL SCIENCE**

№62A

**Editors: A. Arneth, H. Korhonen, M. Kulmala,
M. Raivonen, T. Ruuskanen and T. Suni**

**Proceedings of ILEAPS:
Integrated Land Ecosystem - Atmosphere Processes Study
International Open Science Conference
29 September - 3 October 2003, Helsinki, Finland**

Volume 1

CONTENTS

PLENARY TALKS

Avissar R. The impact of deforestation in tropical regions on the regional and global hydrometeorology	P1
Baldocchi D. Surface fluxes and their importance in the land-atmosphere system – a Fluxnet perspective	P2
Christensen T.R. Key aspects in land surface atmosphere interactions: Methane	P3
Finnigan J., Raupach M. Transfer of materials and energy in the soil-canopy-boundary layer system; measurements and modelling: a perspective for the next ten years of research	P8
Guenther A. Key species in land surface atmosphere interactions: Biogenic Volatile Organic Compounds	P12
Kulmala M. Biosphere – Aerosol – Cloud – Climate Interactions	P16
Lelieveld J. Self-cleaning capacity of the atmosphere and land-biosphere processes	P22
Rosenfeld D. Feedback between cloud/aerosol interactions, precipitation and surface processes	P25
Scholes M.C., Otter L.B., Lowman G.R.P. Terrestrial ecology and the interactions with trace gas fluxes	P28
Silva Dias M.A.F. Coupled system dynamics and chaos: perspectives for biosphere-atmosphere research within the earth system modeling	P33

POSTER ABSTRACTS

Altimir N., Rannik Ü., Reissell A., Suni T., Vesala T., Kulmala M., Hari P. Measurements of ozone flux at shoot and canopy scale: Description of the ozone sinks	1
